Professional Profile

A highly motivated and adaptable third-year BSc Software Engineering student at Babcock University with a GPA of 4.1/5.0. Passionate about building software from first principles, with a focus on web, systems, networking, accessibility, graphics, and interactive applications. Possesses a strong technical curiosity and leadership potential, eager to tackle ambitious real-world problems with unfamiliar technologies.

Technical Skills

- **Languages:** JavaScript, TypeScript, C#, HTML, CSS
- **Frontend:** React, Vite
- **Backend:** Node.js, Firebase
- **Game Development:** Unity
- **3D/Graphics:** Blender
- **Tools:** Git, Netlify, VS Code
- **Expertise:**
 - Full-stack Development
 - Web Accessibility
 - Networking Protocols
 - System Architecture
 - Simulations
 - Procedural Animation
 - Interactive Applications

Featured Projects

- **Custom Browser Engine:** Architected a browser engine from scratch, delving into rendering pipelines, parsing, networking, and memory management.
- **Sense Aid:** Served as Lead Developer in a six-person team, creating an accessibility platform for users with visual, auditory, or speech impairments using HTML, TypeScript, Node.js, and Firebase.
- **Markos-v1:** Developed a responsive personal portfolio website utilizing React and Vite.
- **NFC Hardware Bridge:** Implemented a solution for transmitting NFC scan data from mobile devices to desktop applications over a network.
- **Power Logic Dashboard:** Created a web-based simulator for power logic systems and manual overrides.
- **Procedural 3D Motion Graphics:** Developed realistic vehicle animations and educational visualizations using Blender.
- **Unity Game Mechanics:** Engineered interactive gameplay systems in C# for Unity projects.

Leadership & Recognition

- **Lead Developer** for the Sense Aid project.
- **Certificate of Participation** in the Innovation Challenge 2024, Babcock University.

Engineering Philosophy

I thrive on learning unfamiliar technologies and applying them to solve challenging, real-world problems. My approach is grounded in adaptability, a commitment to clean architecture, ensuring accessibility, and a drive for continuous improvement through hands-on building and exploration.

Connect with Me
